

Overview

'Providence' literally means "*The positive influence of outside forces*" and represents an evolution in outsourced software development.

The Providence group of companies has over 20 years of domain expertise and as a development powerhouse provides tools and resources, and successfully develops business solutions for the web development and allied industries worldwide.

By adopting world "*best practices*" such as the Providence Teaming Framework and associated Development Methodologies together with its formally accredited Team of Microsoft & UNIX professionals, Providence is able to efficiently deliver cost effective, *world class* scalable solutions.

Providence key personnel are members of the ACS (Australian Computer Society) and a corporate member of the PCS (Philippine Computer Society) and the PSIA (Philippine Software Industry Association) and a leader in the field of x-platform .net solutions, wireless and content management systems.

The Providence development Powerhouse Team deliver tangible benefits through:

- An instantly scalable team
- Decreased time to market
- Abstracted HR management
- Reduced costs & improved processes
- Increased product & documentation quality
- The power to do more

providence benefits
