

Providence solutions represents an **evolution in outsourced software development**. As an international web development powerhouse we provide solutions, tools, technologies and frameworks for the web development community.

The business solutions offered are .net based, scalable & built on proven methodologies using de-coupled open source components designed to run on Windows, Unix & thin client platforms.

In practice 80% of a typical business solution can be built from reusable components in 20% of the time of a traditional project. For our web developer clients that means a huge saving in time and cost whilst at the same time a great opportunity to make larger profits.

Solutions may include CRM, ERP, Portals, eLearning, eCommerce, event management systems, wireless solutions plus much more. Our range of services extends to:

*Graphic Concept & Design
Web Construction
Application Development
Hosting Services
Search Engine Optimization*

*Data Entry & Bureau services
Wireless Networking
Turnkey Solutions
Technical Support Services
Installation & Support*

Visit the Providence Solutions Corporation site today to find out how we can save you time and money!
